

Planet Smoothie opened in 1995 in Atlanta, Georgia and right from the start they focused on the newest and healthiest ways to live. In fact, they were serving wheatgrass to their customers when other smoothie companies thought it was a new kind of lawn.

Planet Smoothie has a simple goal: to change the way the world eats. They plan on doing that with natural and performance-based foods that taste great, by motivating and educating their customers and always leading the way with nutritional knowledge.

Planet Smoothie is dedicated to making healthy living fun and enjoyable. They promise to always tell you exactly what ingredients are in your smoothie.

They also vow to always educate and motivate their customers to choose healthier lifestyles. They are on a mission to “change the way the planet eats” with smoothies, supplements, snacks and smiles.
